Frdric Dupr, Stefan Gttle, Patrick Jansen, Stijn Simaey : **Constructed Bouquets (Dutch and English Edition)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Constructed Bouquets (Dutch and English Edition):

As in many things, a well-thought out base structure is a necessity to arrive at a good end result. The same goes for constructions and structures used in floral art. A construction, whether it's made from natural or artificial materials, helps surpass the boundaries of what is technically achievable. It can be used to give a creation a three dimensional or architectural shape, can add to or break down symmetry, help explore creative possibilities or simply act as a supplemental decorative touch. Masterflorists Stefan Gttle (DE), Frdric Dupr (FR), Patrick Jansen (NL) and Stijn Simaey (BE) show how it can be done with flair, fun, inventiveness and elegance. Constructed Bouquets presents an inspirational collection of 60 exceptional bouquets with a structural element. Text in English and Dutch.
