**Suzanne J. E. Tourtillott, Nathalie Mornu : Contemporary Bead Wire Jewelry (Lark Jewelry Books)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Contemporary Bead Wire Jewelry (Lark Jewelry Books):

1 of 1 people found the following review helpful. Not too happy with this bookBy Louisie GDon't like too many of the designs really, but I do like the cover pair of earrings. I have used the stitch before, but not with the fringe so that is a neat idea. I wouldn't have bought this if I could have looked through it first.2 of 2 people found the following review helpful. Good book for wire artistsBy CasualObserverWire artists can learn about beading with projects in this book. I just finished the Santa Fe cuff excepting i used onyx beads. The Onyx beads lend a more formal look to the bracelet. It is easy to change looks when the instructions are definitive as in this book.0 of 0 people found the following review helpful. Great addition to my "growing" jewelry resourcesBy Patty E.First read this book from the library! Great addition to my "growing" jewelry resources.

"Making Bead and Wire Jewelry" sold more than 67,500 copies - and because one great success deserves another, here's a second chic collection featuring the very best in contemporary design. Created by today's finest artisans, these pieces all showcase the incredible diversity of interesting beads and wire types available today. The photographs alone will have beaders and jewelry makers sighing with delight: from Marinda Stewart's glistening coppery pink flower pin to Eni Oken's exotic "Bollywood Dreams" earrings, everything's simply stunning. Plus, they're all easy to make, because no soldering's required, just basic wire shaping! Fashion pearly, spiraly post earrings; the gleaming amber "trapped in honey" pendant; a rajah bangle that recalls the jingling ankle bracelets from India (but with beads instead of bells), and other beautiful jewels.

About the Author Suzanne J.E. Tourtillott writes and edits jewellery, ceramics, and general-craft books for Lark Books. She holds an advanced fine-art degree in photography from Indiana University, and wishes she had the time to make art herself.
