0 of 0 people found the following review helpful. Should provide many hours of fun and creativity By Grammy Gave as gift to granddaughter. Should provide many hours of fun and creativity.
3 of 3 people found the following review helpful. Fantastic Fun Book for any crafter By Susan D If you want to have fun with Crafting then this book is fantastic. If you want to craft with kids it's even better. The book is split into four sections. One - Projects geared for younger campers Two - Projects that have more steps than those in one Three - Projects that may take a little longer to complete will need help from adults. Four - Crafts that are geared for older kids. Most of the projects use items that are around the house or are easy to purchase. There are a huge mix of projects and with 40 to choose from I am sure you and/or your children will find something that you really want to make. Each of the projects have clear to understand

instructions. They are broken down into easy steps and pictures are provided where they are needed. There is a good mix of projects that are suitable for girls and boys. They are fun and interesting and sure to keep any age of crafter entertained. I love the fact the projects are fun and colourful. I can just see our house is going to be filled with items made from this book. I love the fact that the projects can be made by different ages of children. I also love the fact that there are points I can help but most of the projects my son can make himself. At the start of each project you see what level of craft it is. You then get a list of all the materials required. Then it's straight into the instructions. With the instructions being split into steps it's easy to follow each part and not worry about the next step till you need to. The book would make a fantastic present for any child. They can also use the book to create items to gift to family and friends. There is nothing more special than a child giving you something that they have made themselves. I love this book. The ideas are fun and interesting. This book is a must! I love it and I hope you will too!!!! I received this book to review. However all opinions expressed are my own. No monies were exchanged.

When school's out, it's time for campcraft camp! Kids (and their parents) will love these 40 projects that include simple beading, sewing, felting, bookmaking, and so much more. Create colorful piatas, eco-friendly mobiles, and up-cycled necklaces, hats, and T-shirts. Boys and girls, and children from 6 to 12, will all find something fun to do! Lots of helpful photographs, and how-to illustrations when needed, explain all the techniques in an easy-to-follow way.
