**Speedy Publishing LLC : Craft Journal** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Craft Journal:

One, if you want to start a new project you will need measurements, materials needed as well as a picture of the final project you're working for. Two, you may have a specific way to improve your project and write down the notes, so you remember these tips. Three, having a craft journal reminds you of all the projects you have done over a period so you can reflect on your accomplishments.
