The chapters divide the crafts into sections for parties, home decor, garden decor, gift ideas and storage ideas. The photos

of the projects are really nice and for the more detailed DIYs there are illustrations showing each step. I loved the picnic basket, which includes mason jars filled with everything from salads to desserts. Another simple idea is filling jars with herbs, spices and citrus to add natural scents to my house without having to use chemical based air fresheners. I was very interested in seeing how to dye glass jars and I liked how they used all types of jars for that craft, including jam and spaghetti sauce jars. I loved the snow globe spice shakers which are a fun twist on the snow globes I had as a child. They look so cute with the little animals peeking out from the different colors of spices. Lots of great ideas, I want to try them all!

Upcycle your glass jars and other vessels into useful and lovely objects. Follow Hester van Overbeeks easy steps to make a fresh flower-decorated tea-light votive for a garden party, store all your grains and pasta in large jars with vibrantly painted lids, or why not surprise a friend with the colorful "birthday in a jar"? There are lots of quick ideas that take no time at all, such as vacation memories in a jar, the table-setting jars, or the floral centerpiece that will charm all your guests. Some are elegant, some are homespun, but all make use of natural materials such as wood, shells, flowers, and leather to give an original but sophisticated feel to your home and garden. Once you are confident in making the simpler crafts, there are more intricate projects to try, using basic DIY techniques: make a fabulous drink dispenser, a desk lamp, or a rustic vase display by attaching jars to a weathered piece of wood. All the projects have clear step-by-step instructions and hand-drawn illustrations to guide you, so all you need to do is pick the project you want to make first!
