**Jane Bull : Crafty Creatures** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Crafty Creatures:

The weather wasn't conducive to outside play, so we spent much of our time crafting, with the help of Crafty Creatures. The photos are wonderful and directions were easy to follow. I bought a big selection of felt, which was very inexpensive. We followed the directions, but used our own creativity. We made a bed for the three bears out of a matchbox cover and added more accessories for a little dog. My grandson did a fantastic job, considering it was his first sewing experience and he had fun. It was a great 'reality' activity. I highly recommend the book and the activities it contains. 1 of 1 people found the following review helpful. Fantastic book - highly recommend for any crafty people - my daughter and I both love it! By M Hebert Absolutely adorable little creatures to make and comes with all easy instructions and templates, etc. I purchased this for my 7 yr old for her birthday, and we have both had so much fun just looking at the pics! We can't wait to get started making the little animals, as they are all very adorable and look to be super easy to make. I'm even

looking forward to making them as gifts! We originally checked this same title out at the library, and after renewing it twice, realized that we wanted to just buy it, so we'd have it always! 1 of 1 people found the following review helpful. These are great projects for kids and adults alike By NoBoMama These are great projects for kids and adults alike. These projects are accessible to the beginner and have clear directions and lots of color photos. I purchased this for myself and my daughters (7 and 4) and will enjoy making many of these together with them.
