Groovy Trooper : Psychedelic Coloring before purchasing it in order to gage whether or not it would be worth my time, and all praised Psychedelic Coloring:

was obviously printed with a home computer. the paper is fine enough for any pen or marker to leak through and pictures are printed double sided in the book. Id say about half of the pictures have been obviously stretched/scaled with an amateur computer program to fit the page and it has resulted to the pictures blurring (very obviously blurry), and no care was then taken to retouch any blurriness before printing. there was also a few pictures that had been cut off from stretching. on the last page of the book it has the date which it was printed, which coincidentally was the same day i placed this order through . looks like they received the order, pushed print and then shipped it out the next day. i wont be returning this because of how cheap it was but BUYERS BEWARE.1 of 1 people found the following review helpful. Look For Something Else or Make Your OwnBy Ashlyn McknightA few coloring-worthy mandalas and images inside, but nothing akin to the picture on the cover which is more of what I was expecting. (That picture isn't even in the book!) Many are smaller images blown up to an entire page, making the lines blurry, while in other images the fine lines and detail don't allow for coloring with ease. This is not a professionally-made book. It feels more like a home-made book "Groovy Trooper" compiled and then put on to sell. Look for something else or make your own...it will be better than Groovy's.5 of 5 people found the following review helpful.
