on adult coloring books on TV I thought it was a joke. Coloring books for adults? No joke here, it is relaxing, entertaining and I am thoroughly enjoying being a kid again. Plus as a quilter and needlework addict the pictures are inspiration for other projects as well. What a terrific idea! I always liked coloring books as a child and my 74 years old self still likes them. Treat yourself, you won't be sorry. 15 of 15 people found the following review helpful. 88 years old and still the artist! By Customer Botanicals in Bloom is the second book purchased for my 88 year old Mother who is an artist and has done many beautiful drawings and paintings after retiring (another Grandma Moses). This adult coloring book was just the thing for her color pencils and time away for secluded thought and a cup of tea. 2 of 2 people found the following review helpful. I like to be able to do a lot of shading ... By Garrett I have two complaints about this book. One is that about half of the pictures are a relatively simple design. I like to be able to do a lot of shading and use a lot of colors with an intricate overall picture. Some of these pictures seem to be more geared to the younger teen than an adult and therefore don't require much time. Also, FYI I thought that since there were 64 pages that meant a lot of pictures. That swayed me more towards this book for the price. However, there are actually only 31 page pictures. The pictures are only on one side which is fine for markers and such, but therefore there are only half the number of pictures. So instead of what I expected to be a relatively decent size coloring book, I got a relatively small one.
