McCourt the week starts on Monday, which unless you notice that right away (which I didn't), may cause you to be off on your dates. Usually calendars start the week on a Sunday, but this must be a European thing to start the week on a Monday. Also, there's no hole at the top of the calendar to put a tack through for hanging on a wall. Right now it's not a problem since it's early in the year and I can punch through 4-5 pages with the tack. But later in the year, when I've got to punch through 10-12 pages, it's going to be an issue. 0 of 0 people found the following review helpful. About 30% blah images By hwilson I'd say about 60-70% of the images are great and the rest are meh. I used to get this calendar each year but started seeing a lot of recycled images and felt kind of gypped but this one is all new. There are a couple fantastic pages (months), some great ones, and several blah. Maybe that's how it is with every calendar?
