Beverley Jollands : Scented Potpourri Floral Gifts: Gifts from Nature Series before purchasing it in order to gage whether or not it would be worth my time, and all praised Scented Potpourri Floral Gifts: Gifts from Nature Series:

2 of 2 people found the following review helpful. ExcellentBy T. GomezStraigth-forward. This author doesn't spend too many words to get to the point, which I like. It gives you basic instructions and ingredient proportions for any potpourri you'd like to make using any materials, by both methods: dry and moist potpourris. In addition, it includes several potpourri recipes, which you can follow or alter, just like cooking recipes. The last section includes several projects, which, although not real fancy-looking, are very good as basic ideas from where you can take-off. I like this book because, as compared to others, it makes this potpourri-making science/art un-complicated.

This book includes plenty of recipes for sweet-smelling mixtures, and projects for making delicate sachets, sumptuous bags and scented cushions of velvet and organza, you can create aromatic gifts your yourself and your friends.
