Ryszard T. Kominek : Uaz-469b (TopShots) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Uaz-469b (TopShots):

- Includes free decals and masking foil • Packed with color photos The UAZ-469 is an all-terrain vehicle used by the Red Army and other Warsaw Pact forces, as well as paramilitary units in Eastern Bloc countries. In the Soviet Union, it also saw widespread service in all state organizations that needed a robust off-road vehicle. The UAZ-469 was introduced in 1973, replacing the earlier GAZ-69. The UAZ-469 presented two great advantages, in that it was able to drive in virtually any terrain and it was very easy to fix, reaching legendary status for its reliability and off-road ability. Modifications include a basic UAZ-469B with ground clearance of 220 mm. This album of detailed photographs is invaluable for the modeler or enthusiast alike. About the Series This is a classic series of highly illustrated books on the best machines of war, with several hundred photographs of each aircraft or vehicle. With close-up views of the key features of each machine, including its variations, markings and modifications, customizing and creating a model has never been easier. Includes extra features such as decals and masking foil.
